PRESIDENT'S MESSAGE

As we continue to grow as a club our membership continues to grow in experience and diversity. I see more new planes and heli's at our field. I am encouraged to see the use of our vertical zone growing on a daily basis. It is evident that overall flying skills in both fixed wing and rotor are developing further. If you have not been to our Face book page recently take a look. We have updates and posts and it would be great to see more. Let's see some posts and pics of all the new stuff or even just the activity.

We are reaching the time of year when we must look to our membership for those willing and interested in stepping up to a board position. We are looking for nominations now and will be voting on who you want to be our board of directors for 2012. We have 7 open board positions and seek to have a board that will continue to build, refine, and develop our club, field, and training programs through next year.

You must be willing to attend monthly board meetings (generally the 3rd Monday of the month). If you are interested let anyone on the board know. As the year continues we continue to grow in membership. We currently stand at 374 members. Weekends still are the most popular time to fly but I understand that weekdays and evenings are seeing more activity. This is great that we are taking advantage of the flying site.

**MEETING MONDAY,
OCTOBER 3, 2011**

**NORMAN P. MURRAY
COMMUNITY & SENIOR
CENTER
24932 VETERANS WAY
MISSION VIEJO, CA. 92692**

7:00 P.M.

While we have had some delays in completing our Wings program we will be wrapping up soon as we secure the necessary wings identification stickers for our badges. From our membership information we have 197 that say they fly at our field we only have 47 that have completed the wings certification. I encourage everyone to as one of the club certified instructors for review of your wings flight so we can achieve this goal. Once we hit the deadline anyone flying must have their wings certification in order to fly without an instructor. With safety our number 1 responsibility we must all work to make sure that everyone flying at our field can maintain control of their plane by executing the following maneuvers:

- Take-off (right or left)
- Fly a flat oval pattern clockwise
- Fly a flat oval pattern counter-clockwise
- Fly a flat figure eight
- Land

We will have one of our certified instructors available every weekend so you can perform your flight. This is a key part of our safety program and after August 31st you must have your wings to fly without an instructor.

(President's Message continued from Page 1

Reminder:

I still hear about some downed planes where radio interference has been mentioned as the possible cause. We want to document when and where these occur. If this happens to you or someone else make sure it is logged in the Field Marshal (red) notebook in the bin. I also want to mention that there are many pilot created reasons that this could occur based on any of these situations:

- Receiver antennae must be away from metal objects and wires. I have seen antennae and satellite receivers placed along servo wires or beside lipo's or ESC's. Any of these could cause diminished or blocked reception at times. Check your radio manufacturer's specifications for placement criteria.
- Verify your ESC and receiver voltage and load criteria. Most of us are flying with ESC's that provide both motor power and power for the receiver and servos. ESC's and Receivers have voltage and load specifications with most rated at 4.8 volts and load rated for 4 or 5 servos. If you have digital servos these draw more power. If you have more servos or load than the rating you could experience brownouts, or low power to the receiver and servos that would result in loss of control.

We will be scheduling another Field Marshal training class in October and I encourage everyone to attend who has not attended one of these sessions. The Field Marshal's (and every member's) responsibility is to enforce and oversee the following key aspects in addition to field oversight:

President's Message continues on Page 3

President's Message (continued from Page 2)

Field Oversight (continued)

- No Badge / No Fly
- All flying must stay beyond the yellow runway centerline
- No taxiing in the pits or spectator area
- Communication on the flight line (pilots calling out takeoffs and landings)
- Everyone must have their own fire extinguisher in out and accessible in their pit area

Reminders:

Flight Safety: Everyone must be diligent in maintaining safe flying in compliance with our rules. All flying must be done beyond the yellow runway centerline and over the grass. To protect the safety of members and visitors no plane should ever fly behind the flight-line (orange fence). In the event a plane breeches this line the pilot must land the plane immediately and determine the cause of this over flight. We must always maintain a safe zone for all behind the flight line.

Field Marshals: There must be a field marshal on-duty anytime our field is open. If you are the first or only one there please put on the field marshal badge from in the container. Our on-duty field marshals have ultimate authority covering all flight and safety aspects.

Field (Our #1 Asset) Safety: With our ever increasing attendance and use of our field we must all be diligent with all aspects of safety. This includes overall safety while flying and personal safety with our planes and batteries. We must all be aware of what is going on around us when flying or just relaxing in the pits.

"No Badge – No Fly": Everyone flying must be wearing their 2011 membership badge. If you have not received your badge yet, then confirm your membership with a field marshal against the current membership roster that is in the storage container. We also have visitor and student badges that are checked out and back in each day so everyone flying must have a badge visible on them.

Fire Extinguisher: Everyone must have their own fire extinguisher out and accessible in their pit area. I look forward to seeing everyone at the field and meetings. Please communicate anything of interest or concern to myself, any board member or field marshal.
